

# VAQUITA Rudder Mounting Hardware Installation Instruction

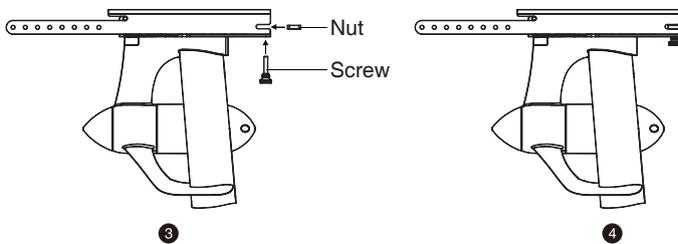

Key Items		
 Rudder Mounting Hardware (1 Piece)		 VAQUITA Motor (1 Set)
 US Fin Box Adapter (1 Piece)		
 Screw (3 Pieces)	 Nut (3 Pieces)	

1. Attach the US fin box adapter onto the motor base: First, align the adapter with the motor base; then insert the adapter into the motor base until it is well attached;

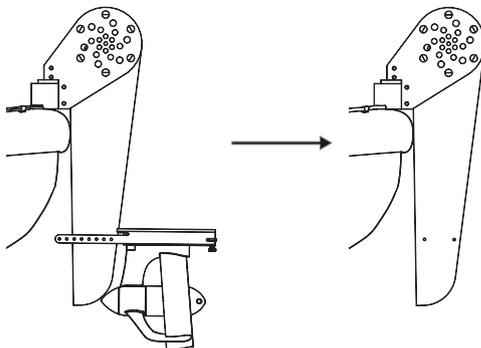

2. Attach the rudder mounting hardware onto the US fin box adapter: Insert rudder mounting hardware into the adapter, then fix it with a screw and a nut.

3. Drill on the rudder: Keep the rudder mounting hardware perpendicular to the rudder, select two holes as far as possible, and mark on the rudder. Then drill two  $\Phi 4.2$  holes.

-  The rudder mounting hardware should be perpendicular to the rudder and the distance between the two holes should be as far as possible.

4. Fix the rudder mounting hardware.
